

Our Accessibility Program

At PPO, we're committed to making our software, website, and support portal accessible to everyone. Our journey is unfolding in phases: first, we're addressing critical issues that may impact key user workflows. Next, we'll focus on achieving full WCAG 2.1 compliance, while ensuring that PPO is highly usable for people with disabilities.

Accessibility isn't just a checklist—it's part of how we design and build. Each team is embedding inclusive practices into their workflows, making accessibility a natural part of everything we do.

If you have feedback or suggestions to improve your experience on our **website, support portal, or within the PPO application**, please contact us at accessibility@go2ppo.com.
